

Social Greeting Card Requirements Gathering

Target release	04 Aug 2022
Epic	⚡ TQ-4 - Develop Front-End IN PROGRESS ⚡ TQ-5 - Develop Back-End IN PROGRESS
Document status	DRAFT
Project Manager	@ Metta Rolando
Front-End Lead	@ Rachel K
Back-End Lead	@ Diego Bryan

🎯 Objective

Design a website where end-users can create social greeting cards and view social greeting cards of end-users they follow.

🌟 Milestones

- ☒ Create repos
- ☒ Gather requirements
- ☒ Answer open questions
- ☒ Develop models
- ☒ Start coding!
- ☒ Initiate first pull request
- ☒ Resolve first merge conflict
- ☒ User can log in
- ☒ User can create card
- ☒ User can follow another user

📋 Requirements

Requirement	User Story	Importance	Jira Issue	Notes
End-user can create account and log in	User has personalized access to app	HIGH	TQ-2	
Login establishes auth_token	Multiple requests are linked to a single user	HIGH	TQ-2	
Create customized card	User can select color, border, font, image, etc. on a card, then post the card	HIGH	TQ-9	
Ability to edit and delete cards	Ability for user to change or delete cards created by that user	MED	TQ-10	
Follow another user	User can choose someone to follow	MED	TQ-11	

Delete/remove follow	User can "unfollow" another user and remove access	LOW	TQ-12	
View list of following	User can see list of all the users they are following	LOW	TQ-13	
View list of followers	User can see list of all the users that are following them	LOW	TQ-14	
View list of following cards	User can see list of all the cards of users they are following	MED	TQ-15	
View list of own cards	User can see list of all the cards they have created	MED	TQ-16	
View list of all cards	User can see list of all cards created by anyone	MED	TQ-17	
Pagination in API	API lists are split into pages for improved loading	MED	TQ-18	
Cards are sorted newest to oldest	List views sort cards from most recently created to least	LOW	TQ-19	
View list of users	User can see list of all users set up on the site	MED	TQ-20	

? Open Questions

Question	Answer
Do users need to view their profile? Is this just viewing a list of their own cards?	Profile page = list of created cards
What do you want to call the cards?	Cards
What design options are available for the cards?	Color (default white with choices), border (default black with choices), font (default with choices), font color (default black with choices), image (optional), text alignment (default center with choices)
When user views cards of following, are they viewing cards by user or all cards of all users they are following?	View following user's profile individually as well as view of all cards of all user's user is following
How do users find other users?	List of all users and hyperlinked user on card
In the UI, will there be pages or infinite scroll?	Infinite scroll
Are we creating this for mobile, desktop, or both?	Desktop
How will FE get sample data before API is ready?	Create JSON file to provide sample

Stand-up meeting on Wed and Fri?	Yes; Friday move to 10:30am
Can unauthenticated user see any cards?	No; must be authenticated to see anything
What is on the home page?	Login screen
Once logged in, what does user see?	List of all cards of users following
Are cards fixed in size?	Yes
Character limit for card text?	Yes; but what is the limit?
How are cards presented on the page?	Single, vertical presentation

How does user navigate to their own profile?	Button on main page
Border style?	Not yet

User interaction and design

Out of Scope

- User can comment on a card
- User can “like” a card
- User can send a card to another user (to any user? only a user that they follow? only a user that they follow that also follows them?)
- User can draft a card
- Border styles
